

Stock Item Overview

Overview

The Materiel Management/Inventory Control Point (MM/ICP) module Stock Item process provides the ability to view, add, update, and delete Stock Item records directly associated with an RSA.

Note

All Stock Item records **must** be associated with a CATALOG STOCK NBR record with a matching Catalog Name in the Logistics Program.

Stock Item records are created to establish attributes specific to an RSA. Those attributes may include:

- RSA
- Item Manager
- Minimum Stocking QTY
- Maximum Stocking QTY
- Freeze Code (Lookup)
- Reorder Point
- Reorder Method (Lookup)
- Minimum Order QTY
- Maximum Order QTY
- Replenishment Source (Lookup)
 - **R** - Requisition (New Procurement)
 - **W** - Warehouse Transfer (for RSAs)
