

## Accounting Transaction Inquiry

### Overview

The Materiel Management/Inventory Control Point module Accounting Transaction Inquiry page displays all the transactions for stock items within the warehouse.

#### Note

Some search fields provide **Intellisense** *i*, which is the automatic completion of a field entry in a software application.

The application displays a selectable word or phrase in that field, based on the input (that was previously entered), without having to completely type the entry.

This is identified by a lowercase italic *i* preceding the field name.
