Inventory Inquiry

Overview

The Inventory Control Point/Materiel Management module Inventory Inquiry process provides the ability to view all the stock numbers managed by the ICP.

> **Note**
>
> Some search fields provide **Intellisense** *i* , which is the automatic completion of a field entry in a software application.
>
> The application displays a selectable word or phrase in that field, based on the input (that was previously entered), without having to completely type the entry.
>
> This is identified by a lowercase italic *i* preceding the field name.
