

Search For a MANUFACTURER PART NBR

Overview

The Catalog - MANUFACTURER PART NBR Search process provides the ability to add, update, or delete a manufacturer of a Stock Number and initiates the creation of a Stock Number. Information for adding a Stock Number is mandatory before an asset can be added. In the DPAS Catalog, the Manufacturer data provides a central reference to the Commercial and Government Entity (CAGE), Manufacturer Name, Manufacturer Model Number, and Manufacturer Part Number. This information is added to each Stock Number in the DPAS Catalog. For this process, the Stock Number must exist on the local DPAS Catalog. Adding a Stock Number to the DPAS Catalog must use the Manufacturer Add process to assign manufacturer information to that specific Stock Number. Multiple manufacturers can be assigned to a Stock Number. Doing this allows the use of fewer Stock Numbers and provides the visibility of the Manufacturer, Make and Model of every asset. For example, an Agency that uses 3/8" drills would assign multiple manufacturers to the 3/8" drill Stock Number.
