

Search for an Ancillary Cost – Criteria

Overview

The Property Accountability module Ancillary Cost process provides the ability to add additional costs and improvement costs to assets. Additional costs, known as ancillary costs, are shown as installation, de-installation, and transportation costs, legal fees, etc. Improvement costs are those costs incurred to 'improve' an existing asset and extend its useful life.

Note

Ancillary Costs are recorded costs or values that include the amount(s) paid to bring the asset to its form and location suitable for its intended use. They are identifiable and Material to the value of the asset. In addition to the amount paid to the vendor, additional, usually subordinate costs that are identifiable, shall be included in the recorded cost.

Navigation

Accounting > Ancillary Cost > Ancillary Cost Search Criteria page

Procedure

Search for an Ancillary Cost

One or more of the Search Criteria fields can be entered to isolate the results. By default, all results are displayed. Selecting at any point of this procedure returns all fields to the default "All" setting.

1. In the Search Criteria box, narrow the results by entering one of the following optional fields.

Help Reference Guide

2. Use to select the Cost Type.
3. Enter the Cost AMT in the field provided. *This is a 12 numeric character field.*

Attention

If the Capital Asset is activated for depreciation, the entered ancillary cost affects the dollar amount of depreciation reported to the agency's accounting system. If there is any question as to the correct dollar amount, select and consult with the agency's accountant or comptroller to confirm before processing.

4. Use to select the ACQ DT, or enter the date (MM/DD/YYYY) in the field provided.
5. Use to select the EFF DT, or enter the date (MM/DD/YYYY) in the field provided.
6. Select . The **Ancillary Cost Transaction Status** page appears.
