Search for an Excess Asset — Criteria

Overview

The Property Accountability module Excess Asset Search Criteria process provides the ability to select assets which are no longer needed and identify them as available to other DPAS sites or to be reported to an excess system. Currently the DPAS interface for excess is the Defense Reutilization and Marketing Service (DRMS) Asset Redistribution Table known as Defense Reutilization and Marketing Service Automated Information System (DAISY).

The Type Action selected is used to identify assets which will be:

- **Pre-notifications**
  — available in the future
- **Excess**
  — available now
- **Withdraw**
  — previously marked as being or becoming available

The Excess process works in conjunction with the Disposition process to remove an asset from DPAS. Assets which are unavailable to Excess are:

- Assets under Suspected Loss
- Assets on the Due-Out Table
- Bulk assets on Pre-notification
- Assets On-Loan
- Leased Assets

Asset Management > Excess > Excess Asset Search Criteria page

Procedures

Search for an Asset to Excess

One or more of the Search Criteria fields can be entered to isolate the results. By default, all results are displayed. Selecting [Reset] *at any point of this procedure returns all fields to the default "All" setting.*

Note

The user role(s) determine what Type Action options display.

1. In the Search Criteria box, narrow the results by entering one of the following fields.

Search Criteria

*Type Action	Prenotification ▾
Asset Id	
Stock Nbr	🔍
Serial Nbr	
i Custodian Nbr	Select A Custodian 🔍

Reset   Search

2. Use ▾ to select the Type Action.

3. Select **Search** . *The **Search for an Excess Asset — Results** page opens.*
