Unit Item Tracking (UIT) Reconciliation Request

Overview

The UIT Reconciliation Request process is used to run an out-of-cycle reconciliation for either all UIC's under one Accountable UIC or a single UIC. Prior approval is required from LOGSA (Logistics Support Activity) to run an out-of-cycle reconciliation.

When a selection is made on the page, a record is written to the Batch Queue. A separate record is written to the Batch Queue Table for each UIC selected in the UIT Reconciliation Request program. The UIT Reconciliation Process then processes the batch record.

Navigation

Asset Management > UIT Recon Request > UIT Reconciliation Request page

Procedures

Submit a Reconciliation Request

1. Use ⌄ to select the UIC.

UIT Out-Of-Cycle Recon

UIC	All ⌄

Reset   Submit

2. Select **Submit**. *The Batch Submission is scheduled.*

Batch Submission

Your Transaction was Scheduled. It will be processed at a later time.
