

Small Arms / Light Weapons Registry Management

Defense Property Accountability System

Printed Manual

Version 28 Jul 2023

Welcome

Overview – DPAS

Welcome to the Defense Property Accountability System (DPAS) Small Arms / Light Weapons Registry Help System.

The Defense Property Accountability System (DPAS) is a Department of Defense (DoD) property management system.

It is the Accountable Property System of Record (APSR) for over 20 DoD Agencies and Military Services.

This online system is administered by the Office of the Under Secretary of Defense for Acquisition, Technology and Logistics (OUSD AT&L), a branch of the Office of the Secretary of Defense (OSD).

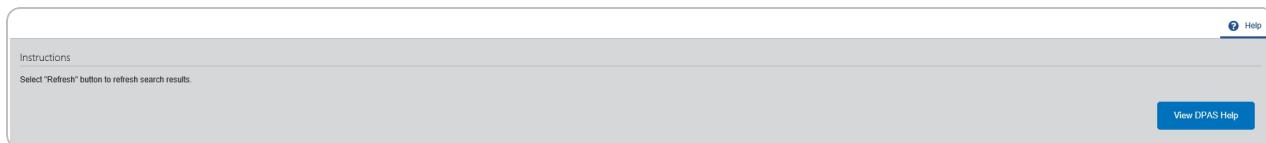

Overview – Small Arms / Light Weapons Registry Help

This online help is designed to provide access to detailed information and instructions about accountability for all weapons within the DoD. This module is in response to a MILSTRAP policy that was DoD mandated.

Defense Property Accountability System (DPAS) Small Arms / Light Weapons Registry Module

Welcome to the Defense Property Accountability System (DPAS) Small Arms / Light Weapons Registry Help System.

DPAS Summary

The Defense Property Accountability System (DPAS) is a Department of Defense (DoD) property management system.

It is the Accountable Property System of Record (APSR) for over 20 DoD Agencies and Military Services.

This online system is administered by the Office of the Under Secretary of Defense for Acquisition & Sustainment/Office of Assistant Secretary of Defense for Sustainment/Logistics (OUSD (A&S) / OASD Sustainment / Logistics), a branch of the Office of the Secretary of Defense (OSD).

Registry Summary

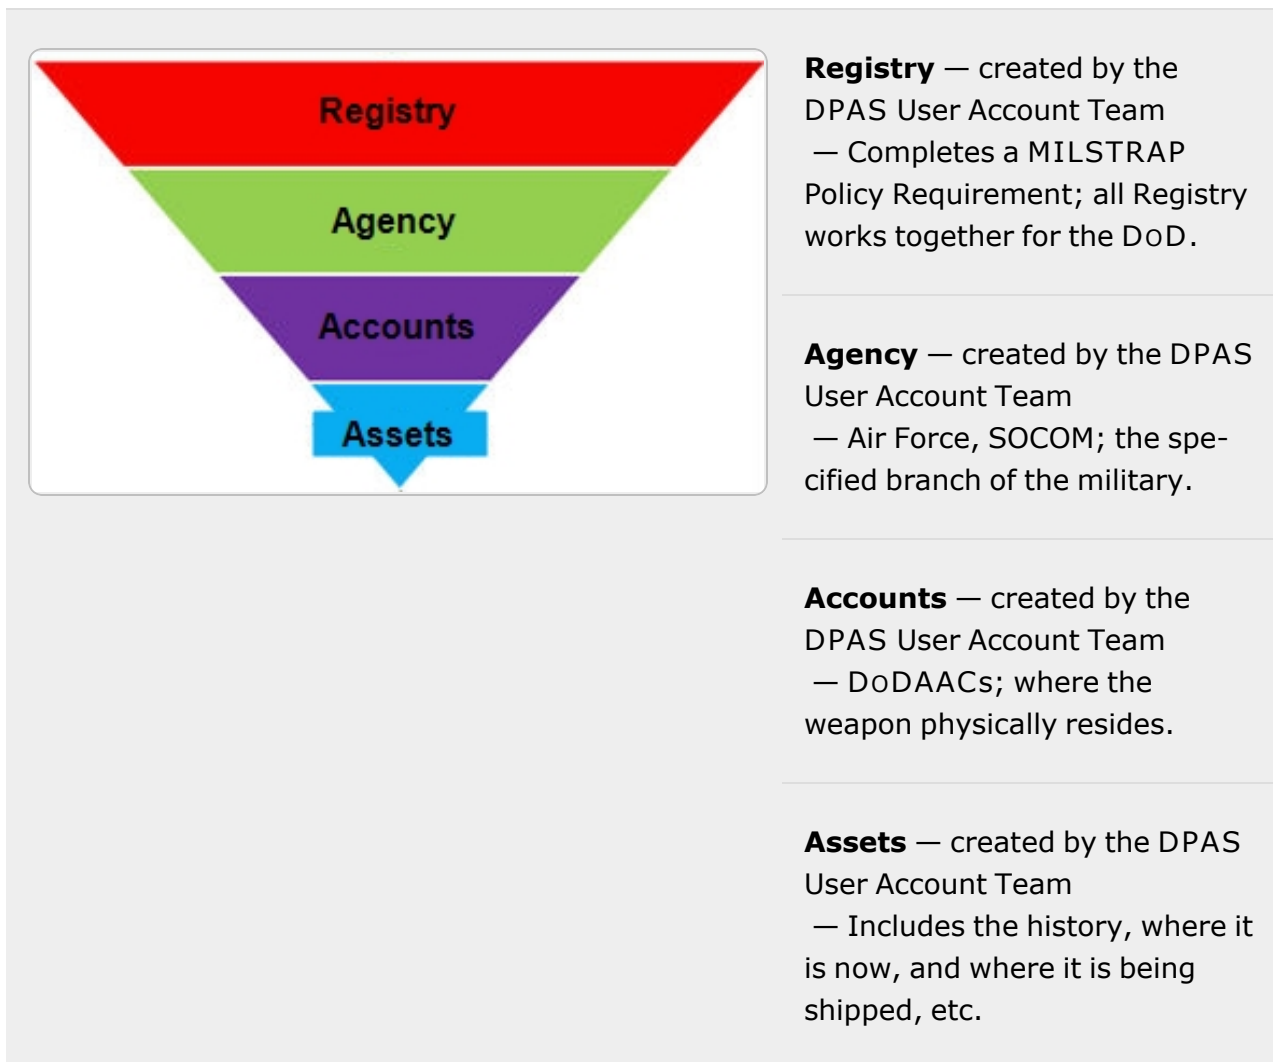

The Small Arms / Light Weapons Registry module is designed to create accountability for all weapons within the DoD. This module is in response to a MILSTRAP policy that was DoD mandated.

There are three ways to enter and manage weapons:

- **Auto Add (DPAS Managed)**
 - The weapons are entered in either the PA or Warehouse modules.
- **Auto Add (Externally Managed)**
 - The weapons are entered through DLMS Transactions.
- **Manually Add**
 - The weapons are entered manually through the Registry module.

Registry Structure

The Registry module is set up in a hierarchy type model:

Registry Key Functions

The main parts of the Registry module include:

- Registry Management, which includes:
 - Registry Asset Management
 - Account Management
 - In-Transit Management
 - Account Reconciliation
 - DLMS Transactions
- Inquiries
 - Registry Asset History
- Report Manager
 - View Reports

Registry User

Registry is role-based, similar to all other DPAS modules. Those roles include:

- **Registry Manager**— the all-encompassing role
- **Registry Administrator** — the utility role
- **Serialization Officer**— the role specific to a DoDAAC
- **Registry Inquiry** — the inquiry role
- **Agency Manager** — the most basic role

The security uses C.R.U.D. methodology:

- **Create**
- **Read (Inquiry)**
- **Update**
- **Delete**

Defense Property Accountability System (DPAS) Small Arms / Light Weapons Registry Module Navigation

Overview

This page describes the primary features found on the Registry pages:

- Blue Menu Bar
- Menu Bar
- Instructions
- Help
- Search Criteria
- Results Grid
- Standard Buttons

Additional information about DPAS can be found at the DPAS Support Site.

Navigation

DPAS Small Arms / Light Weapons Registry Module > Any Process Page >  >

[View DPAS Help](#)

Blue Menu Bar

The Blue Menu bar is at the very top of the page.

The items on the left side are:

- **DPAS logo**  —
Returns to the home page.

- Module Name** Small Arms/Light Weapons Registry ▾ —
 Shows where the user is currently working. Opens to a drop-down list of available modules; select to open a different module.

The items on the right side are:

- Element** Element: Spt Equip 01 ▾ —
 Opens the Active Tier pop-up window. Shows the Forces available to the user.
- User ID** User ID: GROCEBP ▾ —
 Opens the Log Out menu item.

Menu Bar

The Menu bar is between the Red Menu bar and the Process page. While each user's Menu Bar contains different items, they all work the same way to open a Process page. There are two methods to open a Process page: either the Menu item drop-down lists, or the Search field.

Use the Menu item drop-down lists

- Hover the mouse over a Menu item drop-down list. *The drop-down list of the processes in that Menu item appears.*
- Select a process from the drop-down list. *The Process page appears.*

Use the Search field

- Select the down arrow in the Search field. *The complete list of all the Registry processes appears.*
- Select a process from the drop-down list. *The Process page appears.*

OR

- Start entering characters in the Process name in the Search field. *Using Intellisense, the Process names with those characters appear.*

Note

Some search fields provide **Intellisense** , which is the automatic completion of a field entry in a software application.

The application displays a selectable word or phrase in that field, based on the input (that was previously entered), without having to completely type the entry.

This is identified by a lowercase italic **i** preceding the field name.

2. Select a process from the drop-down list. *The Process page appears.*

Instructions

At the top of each Process page is a collapsed Instructions panel.

View the Instructions

- Select . The Instructions panel expands.
- The Instructions panel assists with various options on the Process page:

Help

At the bottom right of the Instructions panel is the Help button

View the Help System

- Select . *The Help System opens in a separate tab.*
- The Help System is context-specific, and opens to the Overview topic for the current Process page.

Search Criteria

Most Registry Processes have a Search Criteria panel. *Use it to narrow the number of records in the Results Grid.*

Use the Search Criteria panel

1. Enter the available information in the fields.
2. Use the field assistance available:
 - Use the drop-down  to select the field entry.
 - Start entering characters in the fields with ***i***.

Note

 Some search fields provide **Intellisense *i***, which is the automatic completion of a field entry in a software application. The application displays a selectable word or phrase in that field, based on the input (that was previously entered), without having to completely type the entry. This is identified by a lowercase italic ***i*** preceding the field name.

- Use  to open the Browse pop-up window.

Select  to perform the search, or select  to clear the fields.

Results Grid

Each Process page displays the corresponding data in a Results Grid. Each Results Grid has basic properties that are always the same.

Those include:

- **Title Bar —**

Shows the overall Results Grid buttons.

- **Column Header —**

Shows the title of each column, along with the ability to sort and / or filter that column.

- **Individual Records** —

Shows the rows of data in the Results Grid.

Standard Buttons

Each Registry process page has some basic buttons that are always the same. *Those include:*

Search Criteria

- **Search**  —

Searches the data within the process results grid.

- **Reset**  —

Erases the entered fields and starts over.

- **Scan CAC**  —

Opens the pop-up window containing the CAC field, ready for the scanned information.

Results Grid

- **Add**  —

Creates a new record in the process results grid.

- **Grid Options**  —

Changes the way information appears in the Results Grid. See Grid Options Overview for additional information.

Individual Records

- **Edit**  —
Revises a record in the process.
- **Delete**  —
Erases a record in the process.
- **History**  —
Opens the History pop-up window, and shows the past edits of the record in the process.
- **Labels**  —
Opens the Print Labels pop-up window, and prints the labels for that record in the process.

Search for a Registry Asset

One or more of the Search Criteria fields can be entered to isolate the results. By default, all results are displayed. Selecting  at any point of this procedure returns all fields to the default "All" setting.

1. In the Search Criteria panel, narrow the results by entering one or more of the following optional fields:.

Search Criteria ^

Stock Nbr <input style="width: 90%;" type="text"/>	DoDAAC <input style="width: 90%;" type="text"/>
Serial Nbr <input style="width: 90%;" type="text"/>	State <input style="width: 90%;" type="text" value="Active"/>
Item Desc <input style="width: 90%;" type="text"/>	Status <input style="width: 90%;" type="text"/>
Last Trans Dt From <input style="width: 90%;" type="text"/>	Last Trans Dt To <input style="width: 90%;" type="text"/>

- Enter the STOCK NBR in the field provided. *This is a 15 alphanumeric character field.*
 - Enter the DoDAAC in the field provided. *This is a 6 alphanumeric character field.*
 - Enter the SERIAL NBR in the field provided. *This is a 30 alphanumeric character field.*
 - Use to select the State.
 - Enter the ITEM DESC in the field provided. *This is a 256 alphanumeric character field.*
 - Use to select the Status.
 - Use to select the LAST TRANS DT From, or enter the date (MM/DD/YYYY) in the field provided.
 - Use to select the LAST TRANS DT To, or enter the date (MM/DD/YYYY) in the field provided.
2. Select . *The results display in the Search Results grid.*

Procedure

DPAS Navigation Helpful Tips

Click the following link to display Registry Navigation Tips.

View the Details of a Registry Account

Selecting either or at any point of this procedure removes all revisions and closes the slider. **Bold** numbered steps are required.

1. In the Search Results box, select the DoDAAC hyperlink. *The Details page appears.*

The screenshot shows the 'Details' page for a DoDAAC account. At the top, there are tabs for 'Details', 'Assets (7)', 'History', and 'Serialization Officers'. The 'Details' tab is active. The page contains a 'Delete' button and a dropdown arrow. The main content area is divided into two columns. The left column contains fields for DoDAAC (SC0010), UIC (FE4664), Account Description (No Description Found), and Remarks. The right column contains Reconciliation State (Past-Due), Last Reconciliation Dt/Tm (11/22/2019 05:30:01), and Next Reconciliation Dt/Tm (11/22/2022 05:30:01). An 'Edit' button is located at the bottom right of the form.

2. Review the available fields:.
- *The DoDAAC automatically populates and is not editable.*
 - *The Reconciliation State automatically populates and is not editable.*
 - *The UIC automatically populates and is not editable.*
 - *The Last Reconciliation DT/TM automatically populates and is not editable.*
 - *The Account Description automatically populates and is not editable.*
 - *The Next Reconciliation DT/TM automatically populates and is not editable.*
 - *The Remarks automatically populates and is not editable.*

Select the Assets tab. *The Assets Tab page appears.*

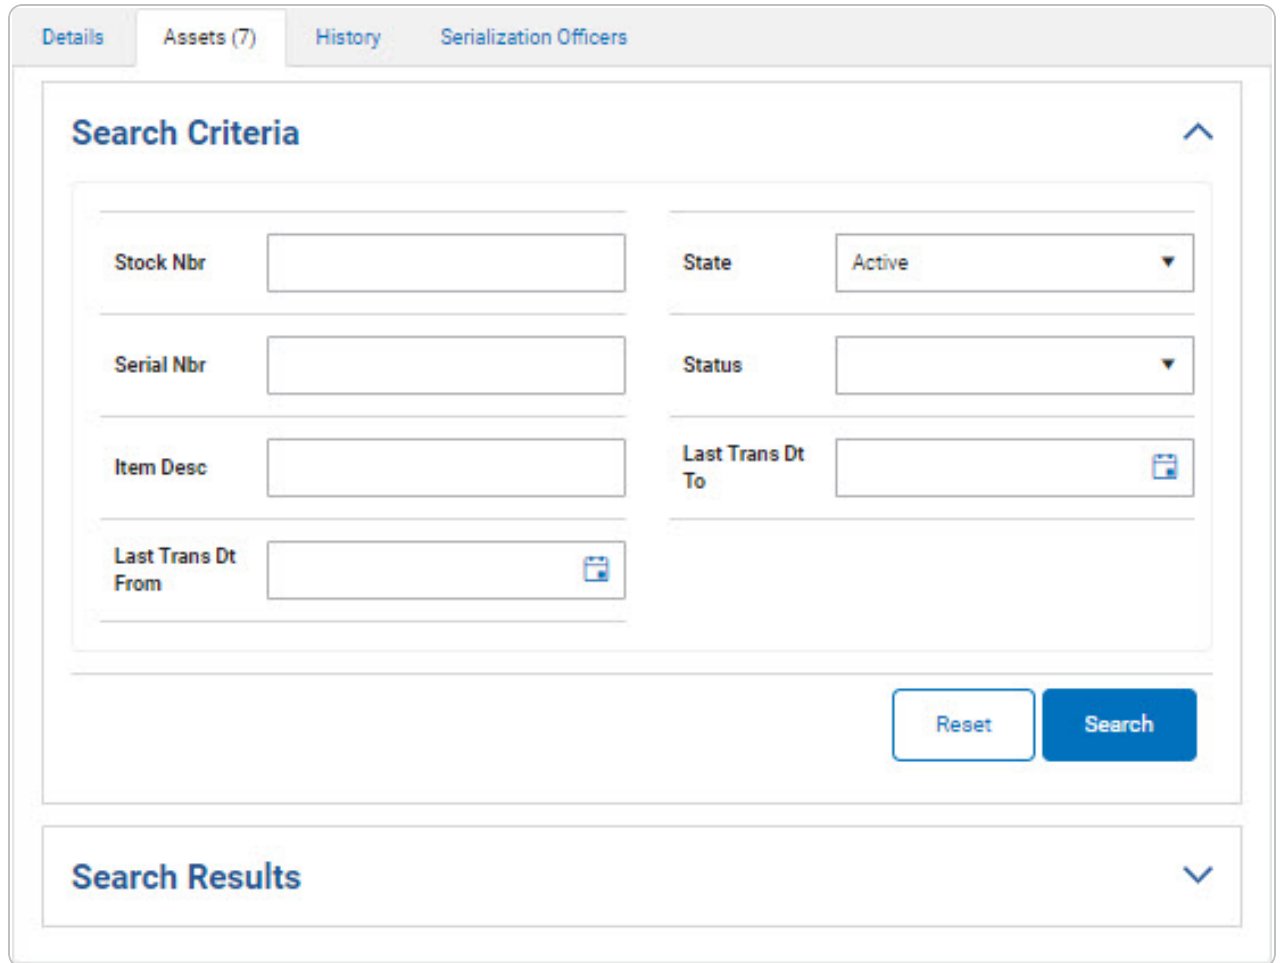

3.

OR

Select the Edit button. *The **Update a Registry Account** page appears.*

OR

Select the Delete button. *The **Delete a Registry Account** page appears.*

The screenshot shows a web interface with tabs for 'Details', 'Assets (7)', 'History', and 'Serialization Officers'. The 'Assets (7)' tab is active. Below the tabs is a 'Search Criteria' section with several input fields: 'Stock Nbr', 'Serial Nbr', 'Item Desc', 'Last Trans Dt From', 'State' (a dropdown menu currently showing 'Active'), 'Status' (a dropdown menu), and 'Last Trans Dt To' (a date picker). At the bottom right of the search criteria section are 'Reset' and 'Search' buttons. Below the search criteria is a 'Search Results' section, which is currently empty and has a downward arrow icon.

- A. In the Search Criteria box, narrow the results by entering one of the following optional fields:.
- Enter the STOCK NBR in the field provided. *This is a 15 alphanumeric character field.*
 - Use  to select the State.
 - Enter the SERIAL NBR in the field provided. *This is a 30 alphanumeric character field.*

- Use to select the Status.
- Enter the ITEM DESC in the field provided. *This is a 250 alphanumeric character field.*
- Use to select the LAST TRANS DT To, or enter the date (MM/DD/YYYY) in the field provided.
- Use to select the LAST TRANS DT FROM, or enter the date (MM/DD/YYYY) in the field provided.

B. Select . *The results display in the Search Results grid.*

Accessibility

The pages on the Defense Property Accountability System (DPAS) web-site are developed to be accessible to individuals with disabilities, in accordance with Section 508 of the Rehabilitation Act of 1973, as amended-29 U.S.C. § 794.

Specifically, the pages have been developed to comply with the following 508 web site accessibility requirements developed by the Architectural and Transportation Barriers Compliance Board (The Board) and published by the W3C as worldwide accessibility standards.

These requirements are based upon the Final Rule as Published in the Federal Register on December 21, 2000 at 36 CFR Part 1195 [Docket No. 2001-01] RIN 3014-AA25 and as published in The Board's on-line guide to the standards for Web-based Intranet and Internet Information and Applications (1194.22).

These requirements include the following:

- A text equivalent for every non-text element shall be provided (e.g., via "alt," "longdesc," or in element content).

- Equivalent alternatives for any multimedia presentation shall be synchronized with the presentation.

- Web pages shall be designed so that all information conveyed with color is also available without color, for example from context or markup.

- Documents shall be organized so they are readable without requiring an associated style sheet.

- Redundant text links shall be provided for each active region of a server-side image map.

- Client-side image maps shall be provided instead of server-side image maps except where the regions cannot be defined with an available geometric shape.

- Row and column headers shall be identified for data tables.

Markup shall be used to associate data cells and header cells for data tables that have two or more logical levels of row or column headers.

Frames shall be titled with text that facilitates frame identification and navigation.

Pages shall be designed to avoid causing the screen to flicker with a frequency greater than 2 Hz and lower than 55 Hz.

A text-only page, with equivalent information or functionality, shall be provided to make a web site comply with the provisions of these standards, when compliance cannot be accomplished in any other way. The content of the text-only page shall be updated whenever the primary page changes.

When pages utilize scripting languages to display content, or to create interface elements, the information provided by the script shall be identified with functional text that can be read by assistive technology.

When a web page requires that an applet, plug-in or other application be present on the client system to interpret page content, the page must provide a link to a plug-in or applet that complies with §1194.21(a) through (l).

When electronic forms are designed to be completed on-line, the form shall allow people using assistive technology to access the information, field elements, and functionality required for completion and submission of the form, including all directions and cues.

A method shall be provided that permits users to skip repetitive navigation links.

When a timed response is required, the user shall be alerted and given sufficient time to indicate more time is required.

If you have trouble using this site, report the issue to the point of contact listed on the Contact Us page.

Consent To Monitoring

This is a U.S. Government (USG) Information System (IS) that is provided for USG-authorized use only.

By using this IS (which includes any device attached to this IS), you consent to the following conditions:

The USG routinely intercepts and monitors communications on this IS for purposes including, but not limited to, penetration testing, communications security (COMSEC) monitoring, network operations and defense, personnel misconduct (PM), law enforcement (LE), and counterintelligence (CI) investigations.

At any time, the USG may inspect and seize data stored on this IS.

Communications using, or data stored on, this IS are not private, are subject to routine monitoring, interception, and search, and may be disclosed or used for any USG authorized purpose.

This IS includes security measures (e.g., authentication and access controls) to protect USG interests — not for your personal benefit or privacy.

Notwithstanding the above, using this IS does not constitute consent to PM, LE or CI investigative searching or monitoring of the content of privileged communications, or work product, related to personal representation or services by attorneys, psychotherapists, or clergy, and their assistants.

Such communications and work product are private and confidential.
See User Agreement for details.
