

Installing the SigPlus Signature Pad for the DPAS Warehouse Management Module

Note: Do not connect the pad to your computer until all driver installation steps are complete.

Phase 1: Download Driver Software

1. Navigate to <http://www.topazsystems.com/sigplusproactivex.html>
2. Select the **Download** option

3. Select the **Save** button – The **Save As** dialog box displays
4. Select the *Desktop* and choose the **Save** button – The sigplus.exe file is saved to your Desktop

Phase 2: Run the Driver Software

You must have administrative rights on the computer to be able to install the driver software. If you do not have these rights, please contact your computer support personnel.

Note: The following instructions are for the Topaz SigPlus Model T-S460. If you have a different model, some settings will need to be adjusted.

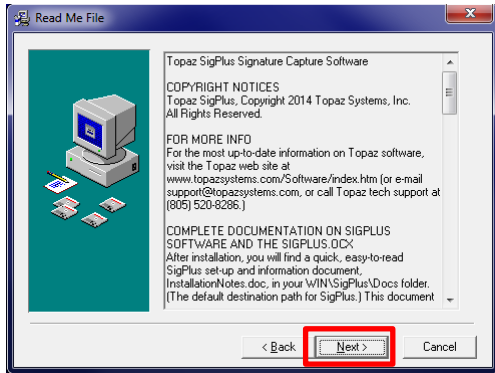

1. Right-click on the **sigplus.exe** file on your Desktop

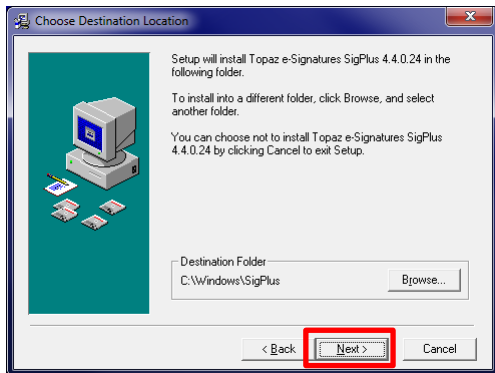

2. Choose **Run as administrator**
3. Enter any necessary credentials – The **Welcome** dialog box displays

4. Select the **Next** button – The **Read Me File** dialog box displays

5. Read the information displayed in the dialog box and select the **Next** button – The **Choose Destination Location** dialog box displays

6. Verify the location is acceptable and choose the **Next** button – The **Determine Tablet Model Group** dialog box displays

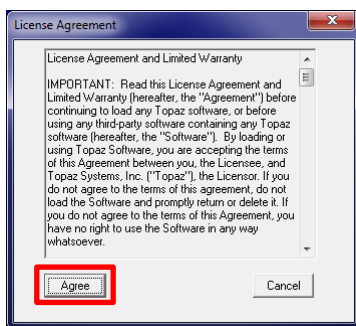

7. Verify the radio button is set to **T-S** and select the **OK** button – The **Choose the Tablet** dialog box displays

8. Select the radio button for *T-S460*
9. Select the **OK** button – The **Select the Connection Type** dialog box displays

10. Verify the radio button is selected for *HSB (USB Type)* and select the **OK** button – The **License Agreement** dialog box displays

11. Read the License Agreement and select the **Agree** button – The drivers install

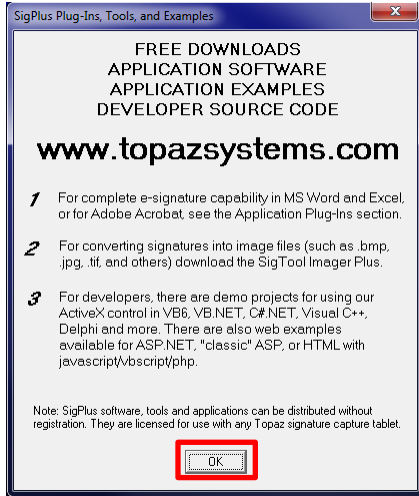

12. Once complete, the **Demo Ocx.exe** dialog box displays

13. Select the *No* radio button and choose the **OK** button – The **SigPlus Documentation Directory** dialog box displays

14. Select the **OK** button – The **SigPlus Plug-Ins, Tools, and Examples** dialog box displays

15. Select the **OK** button – The **Installation Complete** dialog box displays

16. Select the **Finish** button

Phase 3: Plug in the Device

1. Remove the signature pad from the packaging and insert the USB plug into the computer

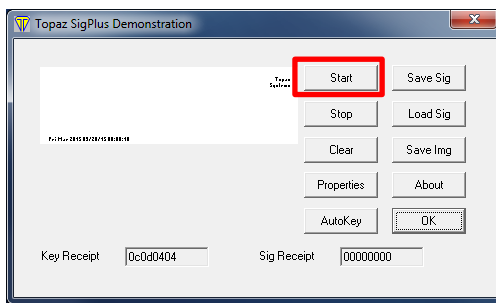

2. Remove blue protective cover from the signature pad face

Congratulations! Your signature pad is installed and is ready for use within the DPAS Warehouse Management module.

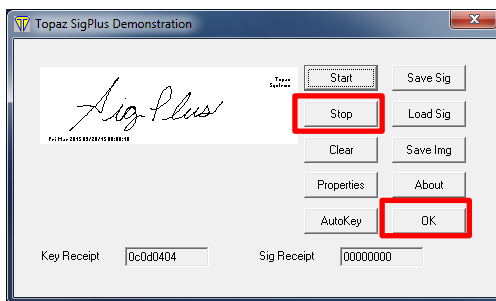

Troubleshooting

After the software driver is installed and the signature pad is connected, use the following steps to test the functionality of the signature pad.

1. Open **My Computer/Windows Explorer**
2. Navigate to **C:\Windows\SigPlus**
3. Double-click on **DemoOCX** – The **Topaz SigPlus Demonstration** window displays

4. Select the **Start** button
5. Using the signature pad pen, sign on the signature pad (The signature should display in the window)

6. Select the **Stop** button
7. Choose the **OK** button – The Topaz SigPlus Demonstration window closes

If no signature displays, please contact Topaz Systems, Inc. for additional support.
