Release Notes Overview

Release 2020.3.2 for the Defense Property Accountability System (DPAS) was released on November 13, 2020.

This release includes system change requests and corrects program deficiencies identified by the user community. The update impacts Enterprise, eCatalog, Inventory, Property Accountability, Maintenance and Utilization, Materiel Management and Warehouse Management modules.

Enterprise

System Change Request (SCR)

The following feature was implemented by this release:

SCR #01632 – PA DLMS 856S/527D Changes

- Updated the 527D/856S DLMS process to make MILS fields available for users to select values, and make the RIC fields optional for the “From” and “To” addresses.

eCatalog

Help Tickets

The following eCatalog Help Ticket was closed by this release:

Stock Number AUD (LPCTN01)

Help Ticket #45094

- Corrected a deficiency where entering certain building blocks for an MCN (without the sequence number) after deleting one with those same building blocks caused an error.

Inventory

Help Tickets

The following Inventory Help Ticket was closed by this release:

Physical Inventory Resolution (LPAID31)

Help Ticket #44162

- Corrected a deficiency where inventories with the Inventory Mode “Serial” were not having the status updated properly.

Maintenance and Utilization (M&U) Module

Help Tickets

The following Maintenance and Utilization Help Tickets were closed by this release:

Work Order AU (WPMAN12)

Help Ticket #45297

- Corrected a deficiency where accessing a closed Work Order that is marked “NMC = Yes” with at least 2-3 NMC status/records, and editing all of the NMC records, resulted in the first record not getting updated.

Help Ticket #45343

- Corrected a deficiency where the Utilization Tab was greyed out and the work order could not open.

Help Ticket #44300

- Added an error message when users add a value greater than zero on Parts Received/Issued Quantity fields when adding a part on work order.
- Corrected a deficiency when the Requested and Received quantities are equal, no records are created.

Work Order Journal Upload (WPMAN22)

Help Ticket #45298

- Corrected a deficiency where the Work Order Journal search filters were not working correctly.

Work Order Inquiry (WPMAQ13)

Help Ticket #45709

- Corrected deficiencies where:
 - Work orders that do not have Assets associated are not getting populated.
 - Work orders that have Asset Filters are not returning any results.

Materiel Management (ICP/MM) Module

Help Tickets

The following Materiel Management Help Ticket was closed by this release:

Inventory Control Point AUD (LPMCN01)

Help Ticket #46039

- Corrected a deficiency where editing an RSA with an empty field, thereby making the RSA not unique, was causing an error.

Property Accountability (PA) Module

System Change Request (SCR)

The following features were implemented by this release:

SCRs #01585 and 01620 – USMC NAF Real Property enhancements

- Created the ability to set an override on an Inspection Due Date with a meter reading, set at the NSN level.
- Allow users to enter multiple configuration records with additional detail, including internal condition index, and a new description field.
- Allow users to track facility condition rating.
- Added the ability to track additional facility condition rating for facility condition reviews.

Warehouse Management (WM) Module

System Change Request (SCR)

The following feature was implemented by this release:

SCR #01597 – Materiel Movement - Unidentified Scans

- Allows unidentified scans from the scanner to be directed into data entry fields.
