Release Notes Overview

Release 2021.1.4 for the Defense Property Accountability System (DPAS) was released on April 30, 2021.

This release includes system change requests and corrects program deficiencies identified by the user community. The update impacts the Warehouse Management Module.

Warehouse Management (WM) Module

System Change Request (SCR)

The following feature was implemented by this release:

SCR #01644 – Improve Individual Issue

- Released several process flow improvements that can be toggled on or off in the Master Data for the Warehouse, and some overall process improvements:
 - When an Issue is completed (issued or backorder generated), the Issue page will automatically be directed back to the Individual Issue landing page.
 - A toggle has been added in the Warehouse Master Data to allow the warehouse to skip the Member Information Update page that usually displays at the beginning of a new Individual Issue and Individual Return.
 - A toggle has been added in the Warehouse Master Data to allow the warehouse to close an issue (Issue or Backorder) without requiring a signature at the time of issue.
 - When Bulk Inventory is in a Stock Item Individual Issue Location or is only in a single location in the warehouse, the requested quantity will automatically be selected as the picked quantity if sufficient inventory exists.
