Release Notes Overview

Release 7.2.00 for the Defense Property Accountability System (DPAS) was released on November 8, 2019.

This release includes system change requests and corrects program deficiencies identified by the user community. The update impacts Appt Scheduler, eCatalog, Enterprise, Force Systems management, Property Accountability, Maintenance and Utilization, Materiel Management, Mobile Platform, Registry and Warehouse modules.

Appt Scheduler

System Change Request (SCR)

The following feature, which is a part of Appt Scheduler SCR 1318, was implemented by this release:

SCR #1318 – Member Size Appointments

- Added database columns for member Profile Appointments.
- Added warehouse field on Member Access Site.

eCatalog

System Change Request (SCR)

The following feature, which is a part of eCatalog SCR 1241, was implemented by this release:

SCR #1241 – eCatalog

- The Pending Catalog transactions functionality, currently only available within PA, will be accessible from all modules within DPAS in support of unified catalog functionality.

The following feature, which is a part of eCatalog SCR 416, was implemented by this release:

SCR #416 – Pending Catalog Transactions

- Changes made to ensure that all information provided within the Pending Catalog transaction is available and brought forward into the cataloging process.

The following feature, which is a part of eCatalog SCR 449, was implemented by this release:

SCR #449 – Catalog Expand Mfr Model Nbr

- Expanded the size of the Mfr Part Nbr field within PA to match warehouse in support of the eCatalog. All modules will enforce and maintain the same data sizes for all mfr part number data.

The following feature, which is a part of eCatalog SCR 1307, was implemented by this release:

SCR #1307 – FSM Phrase Data Support

- Changes made to process and maintain FLIS phrase code data with DPAS catalogs in support of the Allocations management projects.

Help Tickets

The following eCatalog Help Tickets were closed by this release:

Stock Number AUD (LPCTN01)

Help Ticket #28904, #30707, #30206

- Corrected a deficiency where adding stock number (MCN) 100501D17315 was erroring.

Catalog AUD (WPCTN01)

Help Ticket #31109

- Added missing FSC 6026 – Fiber Optic Receivers to the FSC field.

Enterprise

System Change Request (SCR)

The following feature, which is a part of enterprise SCR 1442, was implemented by this release:

SCR #1442 – Extract Info from DPAS to DRCED

- Property Accountability module will now send an extract of accounting records to DRCED on a monthly basis.

The following feature, which is a part of enterprise SCR 1162, was implemented by this release:

SCR #1162 – Maint Issue and Parts Ordered Records Processing and Add Priority Levels and RDD fields to Inquiries and Reports

- Added Priority and RDD fields to Maintenance issue, created sub grid for Work Order parts for partial issuing of Back Order; Added Priority and RDD fields to M&U Inquiries and Reports and Forms.

The following feature, which is a part of enterprise SCR 1445, was implemented by this release:

SCR #1445 – UIT Feed to Include All Assets From All DPAS Modules

- Updated UIT interface to report for all Department of Army Agencies and all equipment.

Force Systems Management

System Change Request (SCR)

The following feature, which is a part of Force Systems Management SCR 1307, was implemented by this release:

SCR #1307 – Force Systems Management (FSM)

- Created FSM Inquiries for Authorization.
- Updated Apply Auth with Major Command Codes.
- Created Authorization Manager assignment and roles within FSM.
- Updated DPAS Grids within FSM validations.

Maintenance and Utilization (M&U) Module

Help Tickets

The following Maintenance and Utilization Help Tickets were closed by this release:

Maintenance Actions AUD (WPMAN15)

Help Ticket #28723

- Corrected a deficiency where searching by Approval Date field on the M & U dashboard was not returning the correct results.

Work Order AU (WPMAN12)

Help Ticket #27781, #28700

- Corrected a deficiency where the non-labor costs on the basic tab of work order did not calculate correctly.

Work Order Inquiry (WPMAQ13)

Help Ticket #26012

- Corrected a deficiency where Sub WO Labor inquiry showing total hours/Cost rather than individual hours/Cost.

Maintenance Asset Inquiry (WPMAQ10)

Help Ticket #30462, #32649

- Corrected a deficiency where equipment pools were not appearing in drop-down list on inquiry screen.

Operator/Technician Inquiry (WPMAQ33)

Help Ticket #29531

- Corrected a deficiency where Operator/Technician Inquiry showed all Labor Categories for all Op/Techs rather than Op/Tech record-assigned categories only.

Materiel Management

System Change Request (SCR)

The following feature, which is a part of Maintenance and Utilization SCR 1177, was implemented by this release:

SCR #1177 – Modify DPAS to support the Receipt and Mgmt of Customer Requisitions

- ICP now supports the DLMS 511M for Customer Requisitions. Requisitioners can submit a modification request (511M) to the ICP for a previous Requisition.
- ICP now supports the DLMS 869A and 869F Inquiries. Requisitioners can submit follow-up requests to the ICP on their previous Requisitions.
- A new report is available for the ICP to display the Time Definite Delivery metrics of each Requisition received by the ICP.

The following Materiel Management Help Ticket was closed by this release:

DLMS 511R - Requisition (LPGLM22)

Help Ticket #30819

- Updated 511R XML file:
 - Any inbound XML file is placed in archive folder in GEX.
 - Inbound XML files will not be duplicated when placing them in archive folder.
 - Inbound 511R transactions will not be duplicated in data base.

Mobile Platform

System Change Request (SCR)

The following feature, which is a part of Mobile Platform SCR 1235, was implemented by this release:

SCR #1235 – Mobile Application

- Added import functionality that will enable the system to import excel files to mark items as inventoried. The excel files can be populated using the DPAS UWP application, manually, or other tools.

The following Mobile Platform Help Tickets were closed by this release:

Physical Inventory – Mobile Device (LPAID30)

Help Ticket #29316

- Corrected a deficiency where PIN prompt was not getting called on AFNET network.

Help Ticket #29299, #31845

- Corrected a deficiency where App Installer failed to install package dependencies.

Property Accountability (PA) Module

System Change Request (SCR)

The following feature, which is a part of Property Accountability SCR 1305, was implemented by this release:

SCR #1305 – CMOS 945 response 1348 update

- Upgraded DD Form 1348-1 and provided default capability of RICs within Master Data.

The following feature, which is a part of Property Accountability SCR 1307, was implemented by this release:

SCR #1307 – Update UIC Inquiry in PA

- Updated PA UIC inquiry with Force Managed related fields, FAD, Priority and DLMS default values.

Help Tickets

The following Property Accountability Help Tickets were closed by this release:

Pending Transactions UD (WPHRN53)

Help Ticket #31131

- Corrected a deficiency where user received a failed transaction result during disposition of bulk asset.

System Identification AUD (WPUTN12)

Help Ticket #31861

- Corrected a deficiency where user was not able to add a SYSID to a different UIC.

Help Ticket #30839

- Corrected a deficiency where user was not able to update the SYSID description.

Asset Update (WPHRN51)

Help Ticket #29601

- Corrected a deficiency where user was not able to update the loan end date on assets in asset update.

Help Ticket #29106

- Corrected a deficiency where user was not able to update cost center in asset update.

Help Ticket #26637

- Corrected a deficiency where choosing an Agency Field Name from drop-down was erroring.

Software Catalog AUD (WPITN03)

Help Ticket #27691

- Corrected a deficiency where user was not able to complete catalog/receipt on asset receiving.

Registry

System Change Request (SCR)

The following feature, which are a part of Registry SCR 1303, were implemented by this release:

SCR #1303 – Add New Registry Module

- Implements the new functionality for reconciling Registry Assets on an annual basis.
- Adds new screens for reviewing historical changes of Registry Assets.
- Adds a new Add/Update/Delete suite of functionality for Accounts in the Registry.
- Implements security restrictions for users with the Serialization Officer role to only view Accounts they are assigned to and their Registry Assets.

Warehouse Management (WM) Module

System Change Request (SCR)

The following feature, which is a part of Warehouse Management SCR 1484, was implemented by this release:

SCR #1484 – QC Select Items

- All items from an inspection are no longer selected by default when creating a QC. User can select and deselect which items to QC at will. Also, only the items from the chosen inspection will show up as available to select for the QC. Work combined with SCR 1080.

The following feature, which is a part of Warehouse Management SCR 1486, was implemented by this release:

SCR #1486 – DW01 available for non-kitted items with inspections

- A new form has been created to show the inspection schedule on any item in inventory, kit or not.

The following feature, which is a part of Warehouse Management SCR 1487, was implemented by this release:

SCR #1487 – Provide ability to add attachments to a location from the results grid

- Users can now add and view attachments to locations without having to open up the edit dialog.

The following feature, which is a part of Warehouse Management SCR 1488, was implemented by this release:

SCR #1488 – Electronic Signature options for Form 46

- The Form 46 now prints out with a signature block so users can digitally sign it.

The following feature, which is a part of Warehouse Management SCR 1496, was implemented by this release:

SCR #1496 – Delinquent Warehouse Transfer

- On a per warehouse basis, users can set up an alert to be emailed to the POC of that warehouse notifying them that there are warehouse transfers that are significantly past their expected receipt date. The time of "significantly past their date" is part of the warehouse configuration.

The following feature, which is a part of Warehouse Management SCR 1199, was implemented by this release:

SCR #1199 – TCTO – Component Inspections

- Kits will now show up as due for inspection based on the inspection schedule of their components as well as their own.

The following feature, which is a part of Warehouse Management SCR 1080, was implemented by this release:

SCR #1080 – QC Check select for Insp

- All items from an inspection are no longer selected by default when creating a QC. User can select and deselect which items to QC at will. Also, only the items from the chosen inspection will show up as available to select for the QC. Work combined with SCR 1484.

The following feature, which is a part of Warehouse Management SCR 1350, was implemented by this release:

SCR #1350 – QA-QC Reports

- Existing QA-QC Reports (QA/QC Totals and Inspection/QC Completion) have been updated to be filterable and sortable in excel, and have all been combined into a wrapper report called the QC Metrics Report along with a new report named the QA/QC Deficiency Summary.

Help Tickets

The following Warehouse Management Help Tickets were closed by this release:

Materiel Release Order (LPWHN35)

Help Ticket #30786

- Corrected a deficiency where allocations were getting deleted after QC on Materiel Release Order.

Dw Fm 26 – Inspection Report (LPWHR85)

Help Ticket #30676

- Removed Stock Number and ICN column from Assessment Inspection form and also made the reason and comments columns bigger.

Maintenance Issue (LPWHN71)

Help Ticket #26549

- Improved performance on materiel management tab and maintenance issue tab on Maintenance Issue.

Help Ticket #30512

- Corrected a deficiency where cancelled Qty, Cancelled Qty Date, Established by and Last Updated by were not displaying on Maintenance Issue.

Help Ticket #33075

- Corrected a deficiency where the issue is for an item that is not a stock item, critical error was thrown

Sets Kits Outfits (LPWHN41)

Help Ticket #28284, #29605

- Corrected a deficiency where user was getting error when trying to assemble a kit on Sets kits Outfits.

Warehouse Transfer Add Update (LPWHN43)

Help Ticket #32897

- Corrected a deficiency where ICP DODAAC was filling the ‘Ship from’ on DD1348.
