

DPAS SKO Streamline Webinar – Post Session Report

In this online session, DPAS Analysts covered the 5.0.00 Release changes expecting to go to production on Friday February 3rd.

Presented by:

Josh Teed, Trainer/Functional

Q&A:

Jacob Kent, Trainer/Functional

Fred Maley, Trainer/Functional

Recording Location:

DPAS Support Site: <http://dpasupport.golearnportal.org>

Open **Training / Webinar Archive** and find the webinar under the Warehouse Management and Maintenance & Utilization subject heading or search for the webinar title.

Screenshot:

The banner features a central image of a computer workstation including a monitor displaying a data table, a keyboard, a mouse, and a printer. To the left is a handheld device. The background is a blue and white gradient. Text elements include the DPAS Support Team logo at the top left, 'Presented by Josh Teed' in the middle left, and 'DPAS 5.0.00 Release' in large white font at the bottom center. Logos for the Department of Defense, Property & Equipment Policy (OUSD, AT&L, ARA), and Leidos are at the bottom.

Session Statistics:

Session Date	02/01/2017
Number of Registered Attendees	245
Number of Internal Attendees	3

Poll Results:

Did you find the content in this webinar useful? – 41 Responses

Answer	Percent
Extremely Useful – I learned a useful technique or tip	53%
Somewhat Useful – This content was not new for me but is useful	37%
Not Useful – I did not learn anything new	8%
Other – I am providing a detailed answer in the chat pod	2.5%

How would you rate the presentation? i.e. Speaker, Format – 39 Responses

Answer	Percent
Excellent – I would highly recommend this presentation to others	36%
Good - I enjoyed this format and the interaction	54%
Okay - The presentation needed some improvement	10%
Poor - The presentation underperformed for me	0%
Other – I am providing a detailed answer in the chat pod	0%

What would you like to see covered in a DPAS Webinar? – 08 Responses

Answer **Total Sel.**

Interoperability with other logsitcs systems. Item/Asset management of property from wholesale to retail receipt

Disposals

Physical Inventory Refresher

Eventaully, account managers will need to know and understand everything. Therefore, cover the basic and migrate to the larger functions. Broadcasting this periodically will also assist those managers responsible for other areas and unable to join.

asset entered from beginning to end of useful life.

more variety of examples of government furnished property like, to another government activity

Vehicle Management specific portions on how Material Control will be integrated with parts requests from Vehicle Maintainers, and how the process will flow through checkpoints, if any.

Real Property Improvements

Participant Questions and Comments:

Question: Sir, is every FM&A office going to be part of teh Webinar?

* Leidos DPAS 3(privately): The Webinar is available to all DPAS users, you would have to check with your management to see who specifically is attending from FM&A.

Question: i dont have the material mngt tab

* Leidos DPAS 3(privately): The process would have to be included in whatever role you've been assigned within the application. If you're not seeing it, it means it hasn't been assigned to your role.

Question: whats the difference between the two dates?

* Leidos DPAS 3(privately): The dates that were displaying on that specific example were the Last Inspection and Next Inspection dates - the last inspection date is the date the ICN was last inspected - the next inspection date is the date it should be inspected again

Question: is this issuing from whse to whse or is this replacing the MRO

* Leidos DPAS 3(privately): It is not from warehouse to warehouse, and it doesn't necessarily replace the MRO - the Warehouse Issue allows for issue to any DODAAC, and will not set up any shipment transactions or print a 1348.

Question: Can one issue to UICs

* Leidos DPAS 3(privately): Yes - using the "Unit Issue" Functionality

Question: is this primarily for the PEI whse Mod

* Leidos DPAS 3(privately): I'm not sure what the "PEI whse Mod" is, but the purpose of this process is that its the only way to issue materiel out of the warehouse when not issuing to a Member, Unit, or Maintenance Activity

Question: so far everything that we have gone over doesnt have anything to do with FM&A or at least not here at my base. Is teh warehouse supposed to be using DPAS as well?

* Leidos DPAS: This webinar covers the major changes for all DPAS users in Warehouse and Property Accountability

Question: With this option, will be be able to go in on Friday and manually change out UIC's to merge them into one unit?

* Leidos DPAS 3(privately): It depends on how you want to hold accountability to the issued materiel. If the materiel is being issued to various parts of the same Unit - then yes you can consolidate all your units and just break them up by accounts. Otherwise you'll want to keep your units separate.

Question: Why is MRO not searchable in Document Inquiry like Warehouse Transfer and Disposition is?

* Leidos DPAS 3(privately): You can search for an MRO Document in the Document Inquiry.

Question: So we still can not yet add multipile NSN's to MRO?

* Leidos DPAS 3(privately): That is correct. We create a 1348 as the shipping document and that can only accommodate one stock number at a time.

Question: I don't see MRO in the Document Type search field

* Leidos DPAS 3(privately): MRO is not a selection from the Document Type dropdown - but MRO Document numbers can be inquired through the Document Inquiry. We will look into why MRO is not available within the Document Type dropdown within that Inquiry.

Question: Are we done with the changes pertaining to the Warehouse Module in DPAS?

* Leidos DPAS 3(privately): Yes - that's all for the Warehouse Module.

DPAS Release 5.0.00 Webinar Post Report

Question: Also no MRO quantities show up in the Fiscal Report. There's already a bug created for this. Just wondering why this happened?

* Leidos DPAS 3(privately): If that's an existing bug, you can contact the help desk for a status. Its possible the bug has already been fixed and will be released when we go to production.

Question: Real property doesn't apply to CSP at least I don't think . Are there different entities on the call?

* Leidos DPAS 3(privately): Yes - there are numerous PA users as well as various other Warehouse users on the webinar. The webinar is available for All DPAS users.

Question: When warehouse issue was covered will we be able to ship a container with all its contents?

* Leidos DPAS: Warehouse Issue will allow you to issue inventory by stock number. You cannot issue a container with all of it's contents.

Question: Why was the ability to move a container moved from Inventory Update to Warehouse Management?

* Leidos DPAS 3: You will still have the ability to move a container using inventory update - that functionality was just added to the container process as well
