DPAS M&U for Warehouse Management – Post Session Report

This online session will cover the integration of the Warehouse Management (WM) module with the Maintenance and Utilization (M&U) module. The concepts to be covered will include: how equipment moves from the WM module to the M&U module, Work Plans, Work Plan Details, Inbound Errors, Quality Control and Work Orders. A live demonstration of how to process equipment from the WM module through the M&U module will be presented.

Presented by:

Scott Milewski   Training Specialist and DPAS Subject Matter Expert (SME)

Q&A:

David Brooks   Training Specialist and DPAS Subject Matter Expert (SME)
**Duane Gore**   Training Specialist and DPAS Subject Matter Expert (SME)

Session Statistics:

Session Date	March 25, 2015
Number of Registered Attendees	71
Number of Internal Attendees	6

Poll Results:

Did you find the content in this webinar useful? – 31 Responses

Answer	Percent
Extremely Useful – I learned a useful technique or tip	55%
Somewhat Useful – This content was not new for me but is useful	42%
Not Useful – I did not learn anything new	3%
Other – I am providing a detailed answer in the chat pod	0%

How would you rate the presentation? i.e. Speaker, Format – 33 Responses

Answer	Percent
Excellent – I would highly recommend this presentation to others	55%
Good - I enjoyed this format and the interaction	42%
Okay - The presentation needed some improvement	3%
Poor - The presentation underperformed for me	0%
Other – I am providing a detailed answer in the chat pod	0%

What topic would you be most interested in for a future webinar? – 70 Responses

Answer	Percent
Asset Dispositions	16%
Asset Receiving	16%
Asset Transfers	21%
Asset Updates	11%
IT Management	11%
CIP	11%
Government Furnished Property (GFP)	47%
Inquiries	37%
Inventory	63%
IUID – in Depth	21%
Maintenance and Utilization(M&U)/Dispatch	21%
Maintenance and Utilization(M&U)/Work Order	5%
Maintenance and Utilization(M&U)/FAST	11%
RFID Basics	16%
WAWF	47%
Warehouse Management Module	11%
OTHER - I am providing a detailed answer in the chat pod	5%

Participant Questions and Comments:

1. **Question**: Will there ever be any vehicle related webinars?
   Answer: That topic will be scheduled for later in the year.

2. **Question**: Is there a way to input additional information with an NSN? Example: NSN for a Dodge Bobtail may be 2510013541234, but we currently use a vehicle registration number for tracking purposes.
   Answer: Yes, you would add that when creating the Stock Number. Do you use the VIN as the serial number? If not, there are other areas where additional information can be added.

3. **Question**: Receiving will add this asset to the property book?
   Answer: Correct, after the Work Order and Quality Control (QC) processes are complete, it will be added to Warehouse's inventory.

4. **Question**: What about Authorizations and such?
   Answer: These assets are stored in the Warehouse module not the PA module. Authorizations are handled differently in the Warehouse Management module.

5. **Question**: Is it possible to track bench stock items associated with a Work Order in DPAS that can be pulled in its own report.
   Answer: The Work Order inquiry and Work Order Journal can be used to pull information about past Work Orders.

6. **Question**: Does M&U work with PA?
   Answer: Absolutely! The method of getting assets into the M&U module is a little different, but once in the M&U module, the assets can have Work Orders created, be Dispatched, have Utilization tracked along with Warranty, Service and Subscriptions.

7. **Question**: Good morning, I am a Multi Class Warehouse Manager. I heard your comments regarding Warehouse cataloging and receiving but will there be training provided for other vital Warehouse functions such as Warehouse Inventory, Retrograde, and Issue of items from Warehouse stock.
   Answer: Yes, there will be several other processes covered in the upcoming months. These will include: Cataloging, Receiving, Individual Issue & Return, Sets, Kits & Outfits (SKO), Unit Issue & Return and Materiel Release Order (MRO) just to name a few.
